

Interdisciplinary Research Driving Innovation and Public Impact

Prem Jain underscores that federal funding is essential to sustaining the kind of interdisciplinary, mission-driven work he experienced at UC Davis. By highlighting how collaboration across engineering, medicine, computer science and social sciences enables researchers to tackle complex, global problems, he points to the resources required to support such wide-ranging efforts — resources that often come from federal investment.

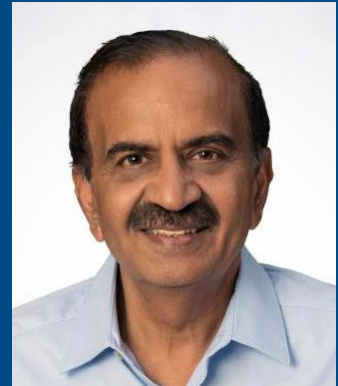

// *It's very important that whatever work public universities do, we are doing it mainly for humanity.” — Prem Jain*
