

SCIENCE IN A POST-TRUTH ERA

A roundtable discussion
for the campus and public
communities

Moderated by **Professor Deb Niemeier** of the Department of Civil and Environmental Engineering and the School of Education, and with opening remarks by Interim Chancellor Ralph J. Hexter, this public roundtable discussion will explore the growing marginalization and suppression of science by political and public leadership—and what can be done to combat it—with four leading UC Davis scholars:

Benjamin Houlton

professor in the Department of Land, Air and Water Resources; Chancellor's Fellow; and director of the UC Davis John Muir Institute of the Environment

Tessa Hill

associate professor in the Department of Earth and Planetary Sciences, and recipient of the Presidential Early Career Award for Scientists and Engineers (PECASE)

Joe Dumit

professor in the Department of Anthropology and of Science and Technology Studies; and director of the Institute for Social Sciences

Veronica Morales

assistant professor in the Department of Civil and Environmental Engineering

This event is part of the new UC Davis discussion series
Dialogue and Discernment.

**Wednesday,
February 22
2-4 p.m.**

Vanderhoef Studio Theatre,
Mondavi Center
